CARRERA: HISTORICAL ITALIAN BRAND

A prestigious recognition for our company

In a temporal journey that spans five decades, from 1973 to 2023, Carrera celebrates its half century of excellence as a fashion brand, ascending to the prestigious **Register of Historic Brands of Italy**. This achievement is of particular importance for a company in the clothing sector, testimony to a long and solid tradition.

Carrera, over the course of these five eras, has navigated tumultuous currents of economic and social transformation, emerging as a **beacon of stability**. It has been able to preserve its social and productive identity intact, consolidating its position as **market leader** over time. Carrera's persistence as a leading brand for fifty years in the men's trousers and jeans sectors is an extraordinary result, the result of the extraordinary loyalty of consumers towards the product and the brand itself.

We recognize that clothing is not just a tangible product, but rather a language, an intricate web of signs and symbols. It is the first non-verbal communication tool, and Carrera's **long history of leadership** reflects its ability to adapt to social changes, maintaining a product and language identity that continues to be **appreciated by consumers**.

When a brand persists over time, it becomes a heritage of those who wear it. Our responsibility, therefore, goes beyond producing high-quality clothing; we are committed to **preserving and protecting** this unique language, treating each product with the respect it deserves.

Carrera has always been committed to promoting a respectful supply chain, embracing every step from the farmer's land to the final consumer's wardrobe. We guarantee **superior quality products and fair prices**, the foundations of an ethical and long-lasting relationship with those who choose Carrera.

Carrera jeans, emblems of our commitment, arise directly from the cotton flower.

We manage all the production phases of the trousers, **from the thread to the fabric**, from the sewing to the washing, delivering to our customers a product that embodies the mastery of the expert hands of seamstresses who, with daily dedication, have been **shaping our history** for half a century.

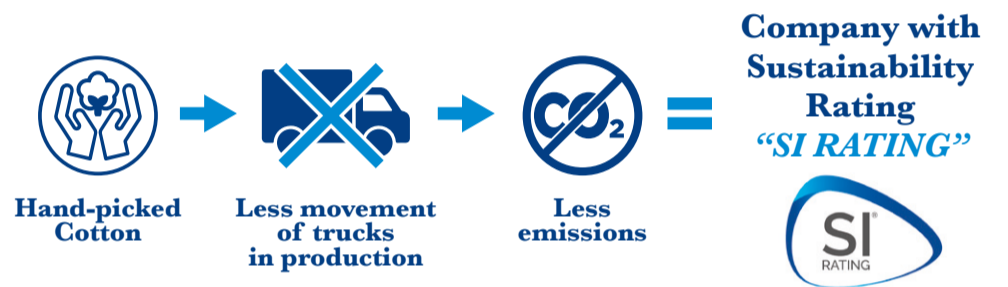

FULLY INTEGRATED SUPPLY CHAIN

Sustainable commitment

Founded in 1965 in Verona by 3 brothers. A pioneer in the production of Italian denim, Carrera Jeans is a **unique reality** of its kind that stands out for the **innovative approach** of the integrated supply chain.

We grow and process our cotton maintaining the **highest quality standards** with the minimum environmental impact. We are convinced that a product that maintains quality over the years must be followed since the birth of the cotton flake.

BLOCKCHAIN: Tracked supply chain

The integrated supply chain of Carrera jeans **environmentally friendly** and tracked with the Blockchain.

Research and Development are the soul of Carrera Jeans

We use systems with a lower environmental impact because we believe in fashion that **takes care of the environment**.
